Subject: Microsoft Settlement

Dear DOJ,

I must make my thoughts known regarding the proposed Microsoft settlement.

It is simple, Microsoft illegally kept the makers of personal computers from controlling their own choice of computer operating systems. This behavior was and continues to be predatory and anti-competitive. American's belief in opportunity, competition, and fair play have routinely been trampled by the self sustaining tactics of this industry giant.

Therefore, any settlement or resolution should insure that Microsoft cannot continue its anti-American behavior. I believe that the current settlement does not meet this criteria and implore you to consider more appropriate measures to this end.

Sincerely,
Joshua Pennington
Fresno, CA
